“I am passionate about bridging engineering innovation with intellectual property to help bring new ideas to life.”

Abraham is an Intellectual Property Intern with a strong foundation in mechanical engineering and information science.

Abraham has experience in advanced manufacturing, product development, and applied research through roles with Ford Motor Company and the University of Michigan. His work includes developing engineering tools, supporting manufacturing system design and validation, and contributing to electric vehicle research through modeling and test system development. He brings skills in CAD, programming, data analysis, and 3D printing, along with an interest in innovation in manufacturing, robotics, artificial intelligence, and intellectual property.

Intellectual Property

Education

- University of Michigan, 2026
 - B.S.E., Mechanical Engineering
 - B.S.I., Information Science
