“As an Intellectual Property Intern, I maintain client portfolios and conduct patentability searches for various client projects.”

Henry attended the University of Michigan where he earned his B.S. in Engineering in Biomedical Engineering. As an undergraduate student at UofM, Henry worked on various medical device-focused projects, including: the construction of a wearable gait analysis device designed to assess patient injury; the design and modeling of drug-eluting hip prosthesis; and the development and testing of a delayed release alginate hydrogel. Henry conducted various in-depth research and examination processes, created initial designs, and worked to improve errors in pursuit of a satisfied end result.

Henry is currently pursuing a M.S. in Biomedical Engineering at the University of Michigan with an anticipated graduation date of April 2024.
