“With legal knowledge and a passion for innovation, I help clients navigate patent law to bring their ideas to life.”

Victoria is a recent graduate of Oakland University where she earned her B.S. in Mechanical Engineering. While earning her undergraduate degree, she assisted on several projects including the development and design of a testing rig for electromechanical actuators, and automatic irrigation system, and a hydrogen fuel mixture and SI engine to minimize CO2 emissions.

Prior to joining Howard & Howard’s IP Intern Program, Victoria worked as a design engineer at New-Matics Industries where she designed a variety of ergonomic material handling systems.

As an intern with Howard & Howard, Victoria assists in various patent research.
